Dallin Johnson

2641 W. 2400 N. Lehi, Utah   (801) 455-5583   dallin.b.johnson@gmail.com

About Me - My dad works in the IT field and has spent a lot of time helping me cultivate my love of technology. The more I learn about programming and database management the more I love it and feel I have found my passion. So, I spend countless hours working on personal projects for friends and family. Which allows me to keep learning and growing my skills as a developer.

Skills

- Ruby 2.4.0
- Ruby on Rails 5
- Rspec
- Factory bot
- HTML 5/CSS 3/Bootstrap 4
- Typescript
- Angular 4
- Vmware
- Virtualbox
- Routers
- MS SQL / MySQL
- GitHub / git
- Docker
- Command Line
- Excel

Projects

- http://www.utahfoodtruckassociation.org/
  Integrated the google calendar and map APIs to display food trucks in Utah locations. Implemented a way for a food truck to be able to market their specific truck, menus, schedule, and map. Also integrated the administrate gem so that admins can manage user's, trucks, and menus.
- https://bens-barbershop.herokuapp.com/
  Integrated the solidus gem for a store front to sell products. Implemented a way for people to make appointments using Calendly.com. Created pages so that customers could be able to get to know Ben the barber, as well as his products, prices, and an image gallery.
- https://dj-devcamp-portfolio.herokuapp.com/
  Portfolio built with Ruby on Rails showing my online resume with a blog that uses Action cable for commenting, Markdown for the body, and a topic filtering to show blogs by topic. Portfolio that show cases my other projects, that I can rearrange with a drag and drop functionality.
- https://dj-webclones.herokuapp.com/
  Clones of popular websites showing my front-end development skills. All the different clones have their own unique styles.
- https://dj-overtime.herokuapp.com/
  The Overtime app prompts managers/employees and documents employees time that they have spent working overtime. We used Rspec to test the app as it was built using TDD and BDD.
- Angular App
  A freelancer app that manages documents and creates proposals that auto calculates pricing and populates the document with content. Then it sends it in an email to the client.
